Double Top

What Is a Double Top? A double top is an extremely bearish technical reversal pattern that forms after an asset reaches a high price two consecutive times with a moderate decline between the two highs. It is confirmed once the asset's price falls below a support level equal to the low between the two prior highs.

Double Bottom

The double bottom pattern is a bullish reversal pattern that occurs at the bottom of a downtrend and signals that the sellers, who were in control of the price action so far, are losing momentum. The pattern resembles the letter "W" due to the two-touched low and a change in the trend direction from a downtrend to an uptrend.

Tripl Top

TRIPLE TOP

The triple top pattern occurs when the price of an asset creates three peaks at nearly the same price level. The area of the peaks is resistance. The pullbacks between the peaks are called the swing lows.

Tripl Bottom

A triple bottom is a visual pattern that shows the buyers (bulls) taking control of the price action from the sellers (bears). A triple bottom is generally seen as three roughly equal lows bouncing off support followed by the price action breaching resistance.
